

Dear customer.

Thanks for your kind inquiry about our game wire fence.

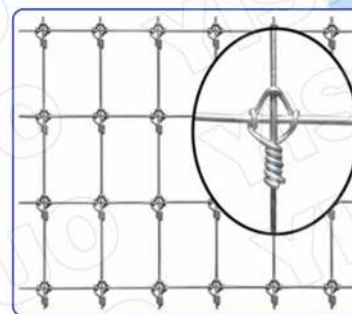

Please kindly check our attached catalog for your reference. If you need quotation, we need more information as follows,

➤ **Which type do you Choose? Hinge joint fence or deer fence?** (The hinge joint fence is more practical and cheaper. The deer fence is stronger, and the price is higher than hinge joint fence.)

Hinge Joint Fence

Hinge joint fence is also known as grassland fence, Cattle fence, Horse Fence, Sheep Fence, Woven Wire, Livestock Fence, Knotted Wire Mesh Fences make an ideal fencing material for grasslands husbandry.

Deer Fence

A cross lock knot is also called a "fixed knot." This knot features a piece of wire that is wrapped over the vertical stay line, looped around the horizontal line once on each side, and finally wrapped around the vertical line again. This results in a super-strong knot and a fence that won't budge. At the same time, the design of its structure can perfectly protect the animal's fur from being damaged. Cross lock knots are ideal for any area that faces a lot of rough weather. Fences secured by cross lock knots can withstand heavy snow, as well as extreme force from your animals and local wildlife. It has high flexibility, high strength, structure firmness, resistance to sliding, pressure, shock and corrosion.

Please kindly check our attached catalog for your reference.
